

HBBR Basic license file installation steps

1 - Install HBBR Basic and determine your Node Key

When HBBR Basic is running for the first time **license file** can not be found and **License Error** dialog will be displayed, this is expected behavior.

Click **OK** to continue

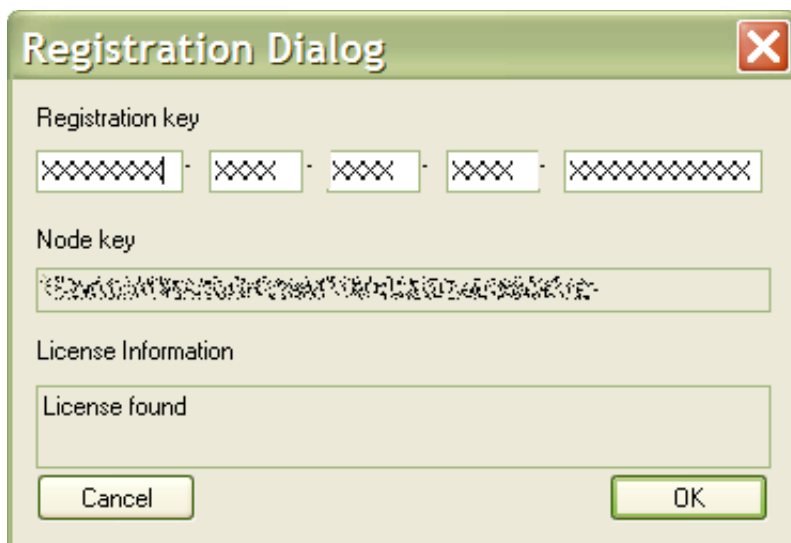

Next **Registration Dialog** will pop-up. It will show empty **Registration Key** and your **Node Key** (highlighted in red). Mark **Node Key** with a mouse and then do Copy (**CTRL+C**) and finally paste it into Notepad. **Node Key** is a 32 character hex number.

2 - Request license file

Request license file by sending e-mail with **Node Key** and your name to license@hbbrbasic.com Or submit the request through www.hbbrbasic.com website.

3 - Install HBBR Basic license file

Copy license file **license.xml** to the **HBBR Basic** installation directory, the same one where **HBBRBAS.exe** is located. Start **HBBR Basic** and **Registration Dialog** will pop-up. Enter your **Registration Key** and click **OK** to continue. Bring back **Registration Dialog** and look for the **License Information**, it will show **License found** if your license file is correctly installed.
